## Bio

I am Textile Designer [Diplom-Designerin (FH)] with practise in the industry and focused on international projects. Since my Education as Textile-Designer I have a continuously Experience in the Textile Industry (Design and Project – Management), Specialized for Woven Fabrics, including a good knowledge about dyeing and finishing. Creativity and excellent technical knowledge gives my special textiles and projects an own character. I am focused, to work with double face fabrics, to take natural fibres and combinations with technical fibres on an high aesthetic and technical level. Covering the Design developments until start of production is included in my professional work. I enjoy my International Experience and Work experience with various cultures, from which I get always new inspirations and a fresh spirit. My good knowledge of English and Japanese language is an important support, to fulfil my creative work. The Application for my own patent in a new woven technique is one of the results of my creativity and ambition to work experimental. (Jacquard double fabric with different designs on both sides ; European Patent Application EP2463419). With all my experience and activities I could imagine, to pass on my knowledge to new challenges on an international level. I would like to continue with experimental work on woven fabrics on a high aesthetic and technical level with focus of the future in the Textile industry.

## -2- PRODUCT INFORMATION

### Product name 1

WYK

### Dimensions

150 cm x 63 cm

---

### Technical description

Textile, Jacquard Double Weave, Linen
