MILAN DESIGN WEEK  
2017

4 - 9  
April

This year Din - Design In 2017 will present the brand new edition of wEating 2017, where the common concept of food truck creates a new hybrid: in the strategic location of via Massimiano 6 / via Sbodio 9. For the first time ever a selection of trucks do not only represent simple bridges between the exhibitions and lunch breaks but finally gain a position as a real event in the event! This first edition is the starting point of a renovated connection between food and design

The event takes place in the spaces next to the Din - Design In location, set like a real refreshment zone with tables, chairs and furniture by designers
